

4,000,000 HEADS FABRICATION CAPACITY

You already know the **Gem** name. What you may not know is that we can fabricate over 4 million heads a year for fire sprinkler installers and mechanical contractors.

Any length. Any volume. Any schedule. Steel plain end or grooved. Any way you cut it, **Gem** can save you time and money. Why?

- LARGE INVENTORY
 - AUTOMATED EQUIPMENT
 - NATIONWIDE FACILITIES
 - COMPETITIVE PRICING

We've got the piping inventories. We've got automated equipment to fab your order with speed and precision. And we've got a nation-

wide network of facilities to get it to you quickly. Our fabrication capacity is greater than any other supplier in North America, and we know how to use those resources to keep costs down and quality up.

You'll find that **Gem** offers the most competitive pipe fabrication pricing for all size projects. Of course, we stock all schedules and sizes of steel pipe and other components needed for your fire protection system.

If your pipe fabrication costs and control are going out of sight, talk to **Gem** about fast, high-quality, cost-effective pipe fabrication at a facility near you.

GEM'S NATIONWIDE PIPE FABRICATION SERVICES

Gem's nationwide pipe fabrication capabilities and fast, dependable delivery help keep your costs under control. With pipe fabrication facilities located strategically throughout the United States, **Gem** can offer genuine nationwide service, featuring fast response and delivery of fabrication when you need it. **Gem** serves you with full-time customer service representatives and a comprehensive quality control program.

We have committed substantial square footage and an extensive inventory to pipe fabrication services.

You can depend on **Gem's** experience to help you complete your project.
